

BlueEFFICIENCY

INNOVATIONS FOR EFFICIENT MOBILITY

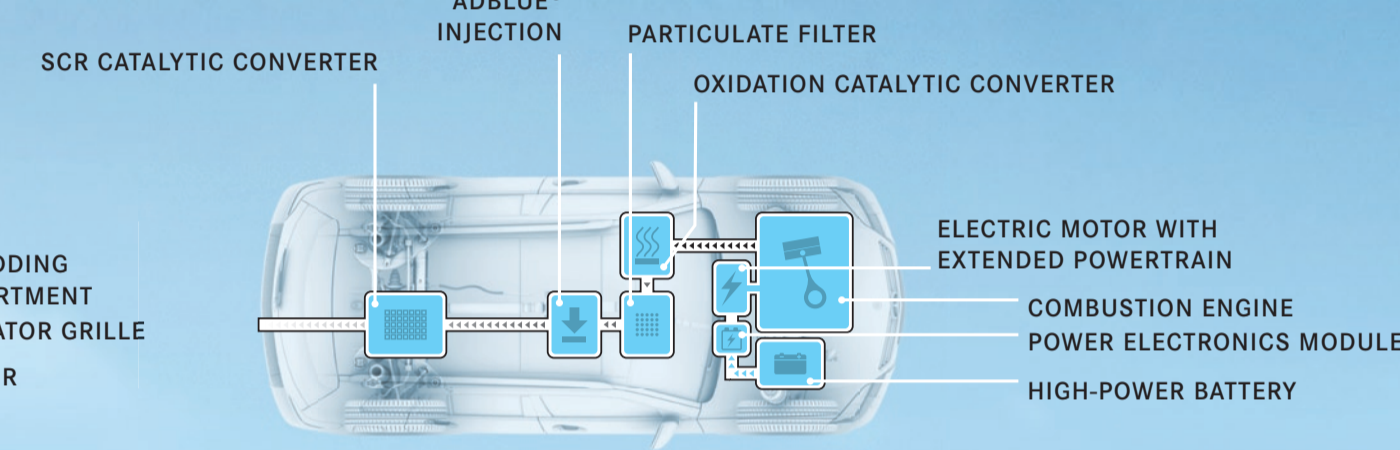

NGT

Natural Gas Technology from Mercedes-Benz cuts CO₂ emissions by up to 20% and pollutants by up to 80%

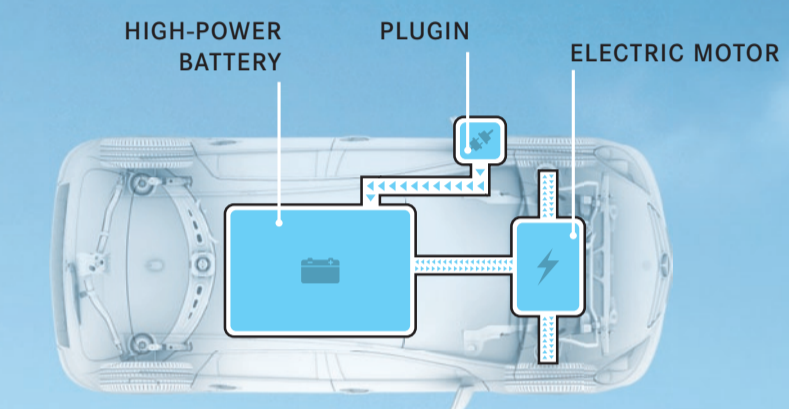

BlueEFFICIENCY

Integrated vehicle optimisation measures which reduce fuel consumption and CO₂ emissions by up to 23%

BlueTEC HYBRID

Clean diesel technology combined with an extremely efficient electric motor

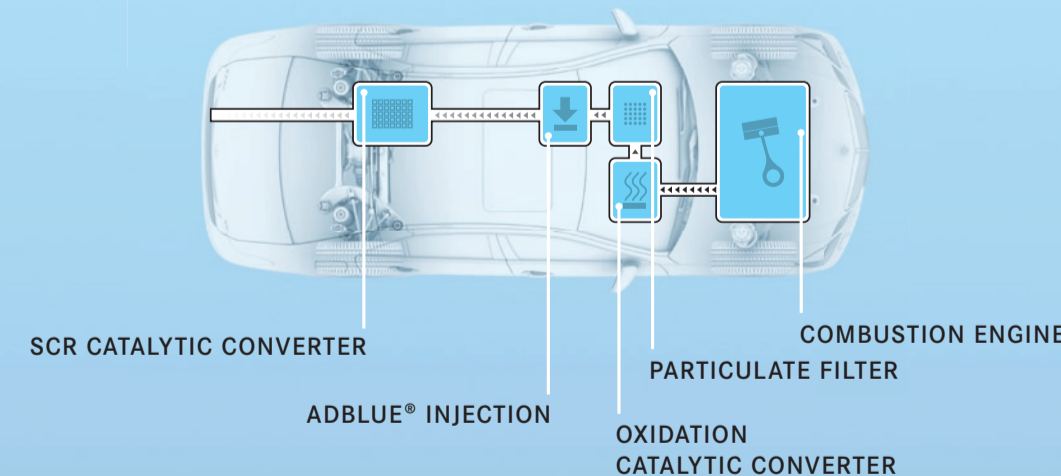

E-CELL

An all-electric drive with a high-power lithium-ion battery system which produces no local pollutant emissions

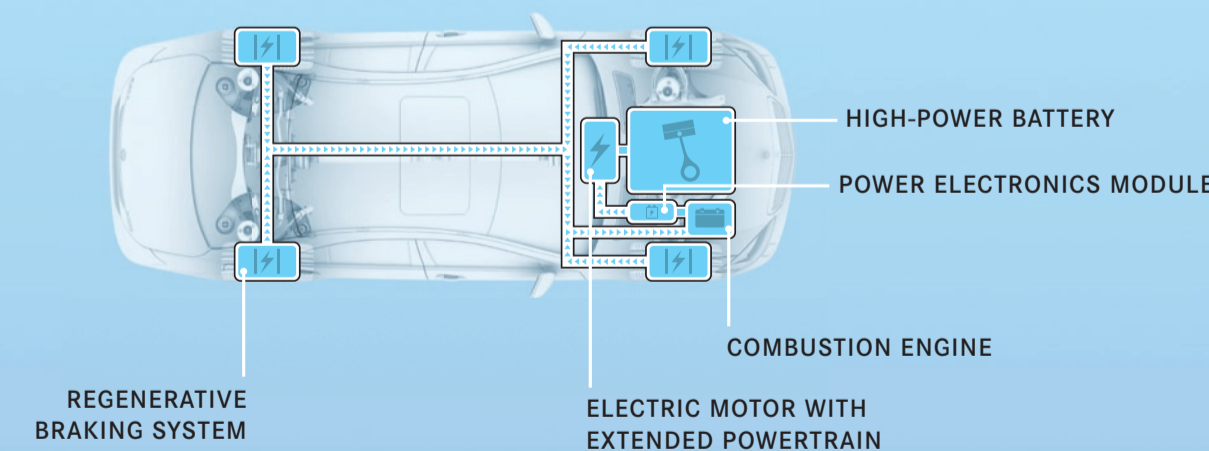

BlueTEC

The multi-stage filter system which eliminates up to 90% of nitrogen oxides is synonymous with clean diesel technology

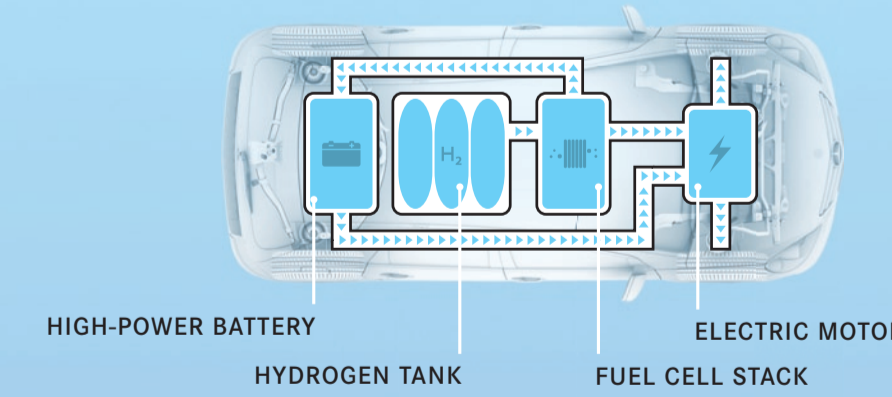

HYBRID

The perfect combination: an electric motor and an optimised combustion engine working as a team

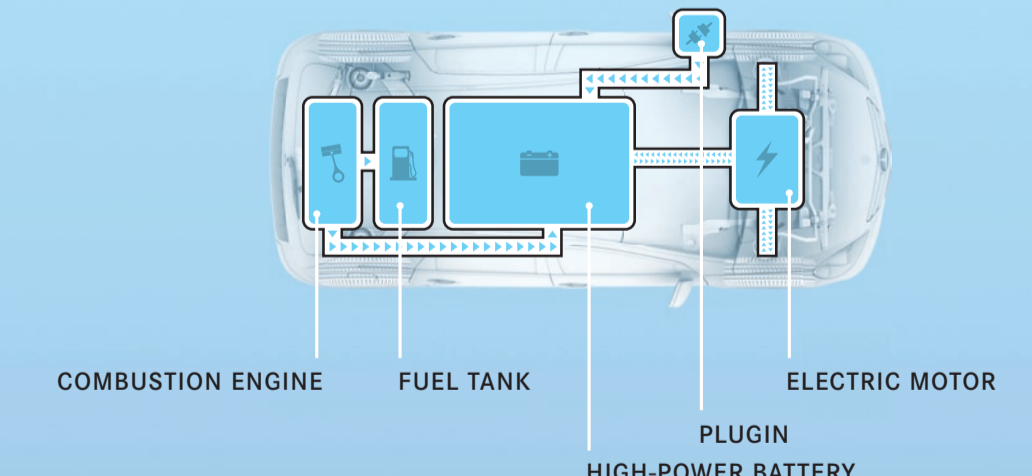

F-CELL

An electric drive which runs on power generated by a fuel cell and produces no local pollutant emissions

E-CELL PLUS

An electric drive with a high-power lithium-ion battery system charged by a petrol engine

Mercedes-Benz
